Upendra Polisetty

Hyderabad, Telangana, India upendrapolisetty0709@gmail.com 8686218895 in/upendra-polisetty

SUMMARY

Results-oriented **Software Engineer** with **4 years** of experience in designing and developing **enterprise-scale web applications** across **banking and e-commerce domains**. Skilled in **React.js, TypeScript, Redux Toolkit, GraphQL, REST APIs, and Micro-frontend architecture**, with hands-on expertise in **secure authentication (Okta, Keycloak), CI/CD pipelines, and performance optimization**. Proven ability to collaborate in **Agile teams** and deliver maintainable, high-impact solutions. Currently expanding backend skills to grow as a **full-stack developer**.

EXPERIENCE

Software Engineer

DataEconomy.ai **June 2024 - Present, Hyderabad**

- Built responsive **UI components** with **React.js, TypeScript, Redux Toolkit, and MUI**, ensuring modular, maintainable architecture.
- Integrated **GraphQL and REST APIs** with **Apollo Client** and **Firebase**, improving data retrieval efficiency and reducing redundant API calls.
- Implemented **authentication flows** using **Keycloak** and **JWT**, enhancing security and compliance.
- Optimized **build performance** with **Vite/Webpack**, reducing bundle size and improving app load times.
- Developed **micro-frontend modules** using **Module Federation**, enabling independent team deployments and reducing release dependencies.
- Secured application with **Okta SSO integration**, ensuring enterprise-grade authentication across multiple user groups.
- Deployed applications on **Nginx** with **Jenkins CI/CD pipelines**, cutting deployment time by **30%**.
- Collaborated with cross-functional teams in an **Agile environment** (Jira, GitHub, Bitbucket) to deliver high-quality, enterprise-level solutions.
- Applied **SOLID principles** and **clean code practices**, ensuring long-term maintainability of large-scale banking applications.

Associate System Engineer

Tata Consultancy Services **February 2022 - June 2024, Bhubaneswar**

- Developed **cross-platform desktop applications** using **Electron.js and React.js**, enabling seamless deployment across Windows and macOS.
- Built **modular, reusable UI components** with **React + TypeScript**, improving code maintainability and scalability.
- Integrated **REST APIs** for secure data exchange between frontend and backend services.
- Optimized **application performance** by reducing memory consumption and improving startup time.
- Implemented **auto-update workflows** in Electron, ensuring smooth upgrades without manual installs.
- Worked with **Webpack and Vite** for bundling and faster build cycles, cutting build time significantly.
- Collaborated with team members in an **Agile environment** using **Git, Jira, and Jenkins** to ensure timely delivery of features.
- Followed **clean code and SOLID principles**, ensuring long-term maintainability of the reefCloud application.

Trainee

JSpiders Training and development Center **July 2021 - February 2022, Bangalore**

- Building **full-stack web applications** using **MongoDB, Express.js, React.js, and Node.js**.
- Designing **RESTful APIs** and integrating them with React frontends.
- Implementing **user authentication and session management**.
- Working with **JavaScript (ES6+), HTML5, CSS3**, and modern UI libraries.
- Developing a **capstone project** showcasing CRUD operations, authentication, and responsive UI.

EDUCATION

B Tech

Siddharth Institute of Engineering and Technology • Puttur • 2020 • 7.5

SKILLS

React.js | JavaScript | TypeScript | Redux Toolkit | GraphQL | REST APIs | OKTA | Microservices | Module Federation | Vite | Firebase | Git | Jira | Jenkins | Postman | React Flow | GitHub | Bitbucket
